# How To Hypnotize People Without Them Knowing!

There are plenty of branches of the magical tree and one of them is an often underutilized and known of technique that can control people's minds without them knowing about it. What I am referring to is the secretive art and sciences of conversational hypnosis.

The purpose of this report is to share with you cunning tactics you can use to actually hypnotize people without them even knowing about it. You can get people to follow your commands and do as you tell them too when you learn the secrets of hypnosis. I have found an amazing course on [conversational hypnosis](#) and I have personally learned from this guide and used the techniques found inside to mesmerize and get people to do what I want them to do.

I can legitimately hypnotize a person in under five minutes through specific conversation techniques and things like body language. [If you want further information on this secretive method of hypnosis you can click here!](#)

Now imagine what it would be like if you could easily influence any person that you met in your daily life. The ability to fascinate, control and inspire people will change your entire life and you can learn practical techniques on how to make this happen. You can create your own private world in someone's mind and have them controlled and easily manipulated when you learn the techniques.

You can learn how to walk into a room and have people's faces light up with excitement. You can get people to agree to do things for you even if they aren't interested. You can charge people to want to be around you and spend time with you and keep you in their thoughts too. When you learn how to master the techniques and abilities associated with conversational hypnosis you can literally change your life. You can become incredibly charming, appear irresistible to the opposite sex, make every interaction with people you speak with more powerful, engaging and memorable, not to mention a lot easier too. You can gain the abilities to actually change people and make them do what you desire.

There are specific techniques and patterns that every single person's mind uses and these known characteristics of human beings in psychology have been carefully recorded and studied. What has come from this research is known as hypnosis and taking it to a further level is conversational hypnosis.

The very first thing you will need to do to be able to hypnotize other people is to first work on your ability to connect with other people. You will want to put your own personal desires, your own thoughts, and opinions away so you can get in sync with the other person. When you choose to hypnotize someone you have to remember it is all about the other person and their mental state and atmosphere.

The second thing you will have to do is to be able to put yourself in a positive mental state even if you are not feeling good. Like I've stated in previous magic spells training lessons you will need to first master your own mind and your thoughts including your emotions before you get anywhere ahead with magic spells and having them work for you.

When it comes to hypnosis you will have to have a powerful and dramatic personality and you must have a set routine in place that you know works. You will need to have the method you speak, your body language, your behavior, eye contact, the pitch of your voice and even how you breathe under control. You will have to be able to place yourself in the right frame of mind before any type of conversational hypnosis attempt is tried. If you have a mind full of stress from work, or you are in a bad mood don't even attempt to hypnotize anyone because your conflicted mental state will hold you back from making any progress.

The third component of conversational hypnosis is to build rapport between yourself and the person you are dealing with. You will want to smile and make eye contact and speak about things that you have in common like a sport or a hobby. You may even share personal memories and share stories about yourself that your intended person has in common with you. There are plenty of ways to build rapport with other people. Then of course there is a hypnotic rapport which is an entirely different thing. I recommend this manual to master conversational hypnosis in a shorter span of time.

When you are building a rapport you will want to do such things as a smile, make eye contact and mirror the other person's body language. You want to keep the conversation flowing and not let it get stale. One of the best secrets of conversational hypnosis is to talk about things that the person you are targeting enjoys and feels positive emotions about.

The biggest and strongest component of conversational hypnosis is being able to target and speak to your targets subconscious mind. We have spoken about the distinct powers and abilities of the subconscious mind and this is where your hypnosis techniques are used. You will need to learn how to pull other people into your conversation and into a hypnotic state so you can get their attention and keep them captivated. You will have to put them into a trance state and that begins with gaining their

keep them captivated. You will have to put them into a trance state and that begins with gaining their full attention and then working on their own personal psychology.

There are certain things that you can do that include technique to help put a person into a hypnotic trance. These ideas include things such as engaging stories, using power words and linguistic bridges, catchy and powerful words and hypnotic themes during the conversation.

You will need to learn how to stimulate the person's subconscious mind and to be able to do this you will have to bypass their conscious minds. The conscious mind is the voice in your head that decides if it believes something or not. It makes judgments and decisions.

Being able to hypnotize someone involves getting past this natural psychic barrier. There are plenty of different methods that can be employed to break down a person's conscious barrier. A good method to get someone into a trance state is to tell an engaging story. Believe it or not, stories are a natural tool people can use to escape reality. We do this on a daily level by watching television shows, reading books, watching movies and hearing stories from other.

A story puts your mind into a different state where it disengages with the current reality. You need to be able to put people into a deep and imaginative state where they are passive and receptive to instructions and information.

This is just a basic outline of the practical techniques that you will need to first understand and utilize before you can actually master conversational hypnosis. Hypnotism is a real skill and is part of the human experience that can be used as a magical effect.

Even magic spells themselves can be used as a method of conversational hypnosis. When a person can truly understand and master this technology of mind control they will have a lot of power. This is not the typical format of magic spells training you are probably used too but it is very effective. If you are interested in learning how to really use conversational hypnosis to control other people [then read this guide.](#)
